

RELAX, IT'S PAY DAY !

Do you get anxious as Pay Day approaches when ideally you should be relaxed? You're not alone!

Here are the top three problems faced by payroll managers and administrators today:

Inefficient Payroll Processes

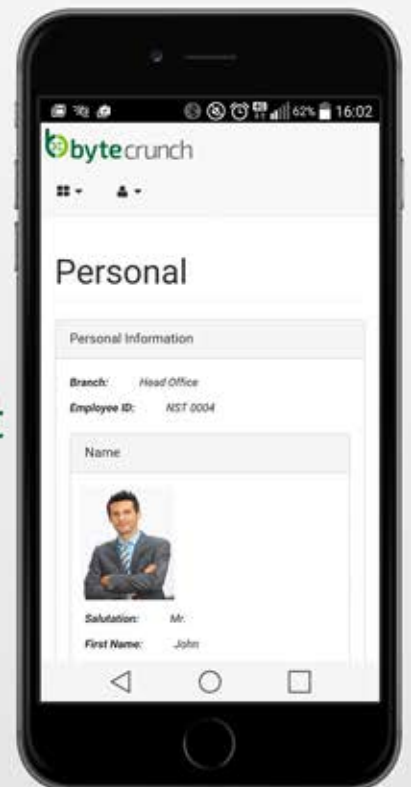

Payroll processes become inefficient due to manual work and a lack of integration. Managers and admins alike get used to repeating these manual and error-prone processes each month assuming there is no better way and are afraid to embrace change.

Data Everywhere Except Where You Need It

Most businesses, small or large, have multiple data sources spread across emails, excel sheets and paper.

No Integration

Without proper integration between the software and data sources, it can take hours to figure out the different payroll elements for each pay period such as hours worked, changes in salaries, reimbursements, deductions and more.

THE PAYROLL SOLUTION YOU'VE BEEN LOOKING FOR

ByteCrunch's All-in-One HR Platform allows you and your employees to handle all tasks from a single place – from hiring to benefits, allowances, time tracking, requesting for paid/unpaid leaves, expense claims and more.

All of this is automated and working in sync to make payroll processing fast and easier.

Fully Integrated Payroll

All Bytecrunch systems including HR, benefits, mobile, time are integrated and a change anywhere reflects in payroll immediately. It's simple and easy to run.

Single Source of Data

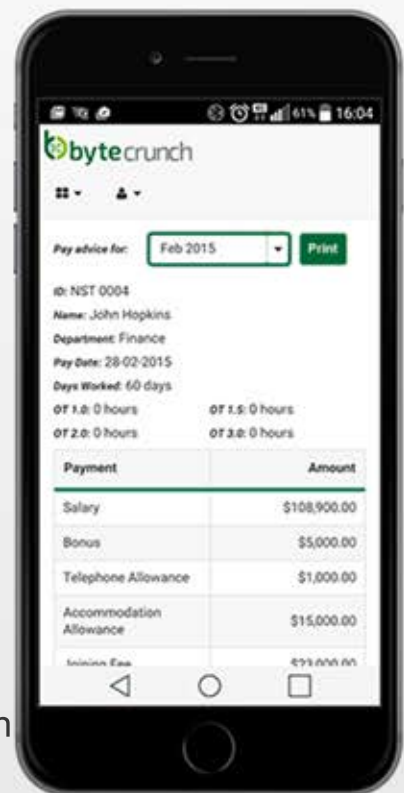

All your data including companies, branches, departments, employees are stored in a single location and you do not need to enter the same information in multiple places. This data source is used by all ByteCrunch modules.

Designed From the Ground Up To be Easy To Use

ByteCrunch has a modern and user-friendly interface that is easy to use and understand. We've continuously improved and fine-tuned our design with years of feedback from HR and payroll users from various industries. The clean interface has been inspired by Microsoft Outlook with tabs allowing you to easily switch between different functions. Our grids allow you to filter data with simple or complex conditions, to add or delete columns and to personalize views by saving layouts with information that you want to see.

Innovation

At ByteCrunch we constantly innovate to bring you the latest features to improve your HR processes and ultimately simplify your life. With ByteCrunch you're not just buying a world class product but you're engaging a professional and well qualified team dedicated to constantly adding value to your business every day of every year.
